30" (Diagonal) 16x9 HDTV Monitor

Features	Benefits
TruFlat™ Picture Tube	The TruFlat <sup>™</sup> tube is designed to provide a distortion-free viewing experience ideal for HDTV, digital broadcast and emerging applications.
TruScan Digital Reality™ Intelligent Signal Processing - "Because the Picture Intended Should be the Picture Presented"	Recognizes incoming signals & progressively converts them to achieve optimum digital picture. Automatically reverts converted film source material for best picture.
Digital 3-Line Comb Filter	Separates black-and-white detail from color information to virtually eliminate edge crawls and rainbow effects while enhancing picture resolution.
Dual HD Component Inputs (SYNCROSCAN™)	Auto-adjusting inputs allow a wide array of component compatible equipment (e.g. DVD/ Satellite) to be con- nected simultaneously. Helps simplify hook-up process.
DVI Input with HDCP	DVI-HDTV allows transmission of (uncompressed digital) video signals from a set-top box to a digital TV. DVI delivers the purest digital transmission available today.
Expanded Stereo with Dynamic Bass	Uses the TV's left & right speakers to create a "live performance" experience.
Sub-Woofer Output	Allows powered sub-woofer to be connected directly to the TV without the need for a separate audio receiver.
